About Plagiarism Detection

Our AI-powered plagiarism scans offer three layers of text similarity detection: Identical, Minor Changes, and Paraphrased. Based on your scan settings we also provide insight on how much of the text you are not scanning for plagiarism (Omitted words).

Identical

One to one exact word matches. Learn more

Minor Changes

Words that hold nearly the same meaning but have a change to their form (e.g. "large" becomes "largely"). Learn more

Paraphrased

Different words that hold the same meaning that replace the original content (e.g. 'large' becomes 'big') Learn more

Omitted Words

The portion of text that is not being scanned for plagiarism based on the scan settings. (e.g. the 'Ignore quotations' setting is enabled and the document is 20% quotations making the omitted words percentage 20%) Learn more

Copyleaks Shared Data Hub

Our Shared Data Hub is a collection of millions of user-submitted documents that you can utilize as a scan resource and choose whether or not you would like to submit the file you are scanning into the Shared Data Hub. Learn more

Filtered and Excluded Results

The report will generate a complete list of results. There is always the option to exclude specific results that are not relevant. Note, by unchecking certain results, the similarity percentage may change. Learn more

Current Batch Results

These are the results displayed from the collection, or batch, of files uploaded for a scan at the same time. Learn more

About AI Detection

Our AI Detector is the only enterprise-level solution that can verify if the content was written by a human or generated by AI, including source code and text that has been plagiarized or modified. Learn more

AI Text

A body of text that has been generated or altered by AI technology. Learn more

Human Text

Any text that has been fully written by a human and has not been altered or generated by AI. Learn more

Copyleaks AI Detector Effectiveness

Credible data at scale, coupled with machine learning and widespread adoption, allows us to continually refine and improve our ability to understand complex text patterns, resulting in over 99% accuracy–far higher than any other AI detector–and improving daily. Learn more

Ideal Text Length

The higher the character count, the easier for our technology to determine irregular patterns, which results in a higher confidence rating for AI detection. Learn more

Reasons It Might Be AI When You Think It's Not

The AI Detector can detect a variety of AI-generated text, including tools that use AI technology to paraphrase content, auto-complete sentences, and more. Learn more

User AI Alert History

Historical data of how many times a user has been flagged for potentially having AI text within their content. Learn more

AI Logic

The number of times a phrase was found more frequently in AI vs human text is shown according to low, medium, and high frequency. Learn more

AI Logic

Shows you the "why" behind AI detection with sources you can see and verify.

AI Phrases

Detects phrases that appear with higher frequency in AI-written text than in human writing.

The frequency of a phrase in AI vs. human text.

3 x — 1098x

1098x **Conclusion The journey to**

How frequently the phrase was found in our dataset:

AI Text	**23.02 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

772x **in professional interviews; and**

How frequently the phrase was found in our dataset:

AI Text	**4.05 / 1,000,000 Documents**
Human Text	**0.01 / 1,000,000 Documents**

726x **maintaining confidentiality, obtaining**

How frequently the phrase was found in our dataset:

AI Text	**1.9 / 1,000,000 Documents**
Human Text	**0 / 1,000,000 Documents**

610x **and empower marginalized voices,**

How frequently the phrase was found in our dataset:

AI Text	**6.4 / 1,000,000 Documents**
Human Text	**0.01 / 1,000,000 Documents**

540x **feedback from marginalized communities**

How frequently the phrase was found in our dataset:

AI Text	**2.12 / 1,000,000 Documents**
Human Text	**0 / 1,000,000 Documents**

386x **crucial for responsible**

How frequently the phrase was found in our dataset:

AI Text	**25.79 / 1,000,000 Documents**
Human Text	**0.07 / 1,000,000 Documents**

349x **and interviews—alongside a commitment to ongoing learning and**

How frequently the phrase was found in our dataset:

AI Text	**5.95 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

309x **staying current with evolving**

How frequently the phrase was found in our dataset:

AI Text	**9.33 / 1,000,000 Documents**
Human Text	**0.03 / 1,000,000 Documents**

224x **next steps, explore the**

How frequently the phrase was found in our dataset:

AI Text	**8.51 / 1,000,000 Documents**
Human Text	**0.04 / 1,000,000 Documents**

183x **SMART goals to guide**

How frequently the phrase was found in our dataset:

AI Text	**1.91 / 1,000,000 Documents**
Human Text	**0.01 / 1,000,000 Documents**

168x **and remaining open to new**

How frequently the phrase was found in our dataset:

AI Text	**15.84 / 1,000,000 Documents**
Human Text	**0.09 / 1,000,000 Documents**

136x **is not just an academic exercise; it is**

How frequently the phrase was found in our dataset:

AI Text	**4.47 / 1,000,000 Documents**
Human Text	**0.03 / 1,000,000 Documents**

116x **remain up to date with emerging**

How frequently the phrase was found in our dataset:

AI Text	**2.28 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

101x **underscoring the necessity for**

How frequently the phrase was found in our dataset:

AI Text	**12.74 / 1,000,000 Documents**
Human Text	**0.13 / 1,000,000 Documents**

101x **and protecting vulnerable populations**

How frequently the phrase was found in our dataset:

AI Text	**22.15 / 1,000,000 Documents**
Human Text	**0.22 / 1,000,000 Documents**

93x **statement speaks to the**

How frequently the phrase was found in our dataset:

AI Text	**24.13 / 1,000,000 Documents**
Human Text	**0.26 / 1,000,000 Documents**

84x **but an ongoing process that**

How frequently the phrase was found in our dataset:

AI Text	**11.59 / 1,000,000 Documents**
Human Text	**0.14 / 1,000,000 Documents**

81x **often fails to capture**

How frequently the phrase was found in our dataset:

AI Text	**36.77 / 1,000,000 Documents**
Human Text	**0.45 / 1,000,000 Documents**

65x **provides information that contradicts**

How frequently the phrase was found in our dataset:

AI Text	**1.11 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

63x **frameworks that adapt to**

How frequently the phrase was found in our dataset:

AI Text	**1.17 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

63x **and inclusion. Additionally,**

How frequently the phrase was found in our dataset:

AI Text	**5.21 / 1,000,000 Documents**
Human Text	**0.08 / 1,000,000 Documents**

63x **mastery of advanced**

How frequently the phrase was found in our dataset:

AI Text	**37.07 / 1,000,000 Documents**
Human Text	**0.59 / 1,000,000 Documents**

59x **that promote disability**

How frequently the phrase was found in our dataset:

AI Text	**1.38 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

58x **seeking feedback from both**

How frequently the phrase was found in our dataset:

AI Text	**1.13 / 1,000,000 Documents**
Human Text	**0.02 / 1,000,000 Documents**

57x **leads to more authentic,**

How frequently the phrase was found in our dataset:

AI Text	**6.05 / 1,000,000 Documents**
Human Text	**0.11 / 1,000,000 Documents**

56x **are foundational in**

How frequently the phrase was found in our dataset:

AI Text	**55.52 / 1,000,000 Documents**
Human Text	**0.99 / 1,000,000 Documents**

56x **research, ethical guidelines, and**

How frequently the phrase was found in our dataset:

AI Text	**1.75 / 1,000,000 Documents**
Human Text	**0.03 / 1,000,000 Documents**

52x **This realization led me to**

How frequently the phrase was found in our dataset:

AI Text	**13.65 / 1,000,000 Documents**
Human Text	**0.26 / 1,000,000 Documents**

48x **and a commitment to inclusive**

How frequently the phrase was found in our dataset:

AI Text	**4.58 / 1,000,000 Documents**
Human Text	**0.1 / 1,000,000 Documents**

45x **observation, and empirical evidence**

How frequently the phrase was found in our dataset:

AI Text	**3.19 / 1,000,000 Documents**
Human Text	**0.07 / 1,000,000 Documents**

43x **standards required in this**

How frequently the phrase was found in our dataset:

AI Text	**3.51 / 1,000,000 Documents**
Human Text	**0.08 / 1,000,000 Documents**

41x **tool that bridges**

How frequently the phrase was found in our dataset:

AI Text	**14.52 / 1,000,000 Documents**
Human Text	**0.36 / 1,000,000 Documents**

39x **methods, particularly those that**

How frequently the phrase was found in our dataset:

AI Text	**6.9 / 1,000,000 Documents**
Human Text	**0.18 / 1,000,000 Documents**

38x **and potential blind spots.**

How frequently the phrase was found in our dataset:

AI Text	**4.93 / 1,000,000 Documents**
Human Text	**0.13 / 1,000,000 Documents**

37x **learned that genuine**

How frequently the phrase was found in our dataset:

AI Text	**1.73 / 1,000,000 Documents**
Human Text	**0.05 / 1,000,000 Documents**

36x **focusing on marginalized**

How frequently the phrase was found in our dataset:

AI Text	**5.01 / 1,000,000 Documents**
Human Text	**0.14 / 1,000,000 Documents**

34x **the intersection of forensic**

How frequently the phrase was found in our dataset:

AI Text	**1.36 / 1,000,000 Documents**
Human Text	**0.04 / 1,000,000 Documents**

33x **disability and neurodiversity**

How frequently the phrase was found in our dataset:

AI Text	**4.32 / 1,000,000 Documents**
Human Text	**0.13 / 1,000,000 Documents**

31x **for ethical and effective**

How frequently the phrase was found in our dataset:

AI Text	**5.41 / 1,000,000 Documents**
Human Text	**0.17 / 1,000,000 Documents**

31x **deepen understanding, and**

How frequently the phrase was found in our dataset:

AI Text	**60.6 / 1,000,000 Documents**
Human Text	**1.97 / 1,000,000 Documents**

30x **cultural humility and**

How frequently the phrase was found in our dataset:

AI Text	**36.74 / 1,000,000 Documents**
Human Text	**1.23 / 1,000,000 Documents**

27x **justice, representation, and**

How frequently the phrase was found in our dataset:

AI Text	**2.88 / 1,000,000 Documents**
Human Text	**0.11 / 1,000,000 Documents**

27x **integrating data from multiple**

How frequently the phrase was found in our dataset:

AI Text	**35.5 / 1,000,000 Documents**
Human Text	**1.33 / 1,000,000 Documents**

25x **while upholding the highest standards of**

How frequently the phrase was found in our dataset:

AI Text	**10.29 / 1,000,000 Documents**
Human Text	**0.42 / 1,000,000 Documents**

23x **to build foundational**

How frequently the phrase was found in our dataset:

AI Text	**26.34 / 1,000,000 Documents**
Human Text	**1.14 / 1,000,000 Documents**

21x **methods whenever possible,**

How frequently the phrase was found in our dataset:

AI Text	**22.69 / 1,000,000 Documents**
Human Text	**1.06 / 1,000,000 Documents**

20x **the development of new frameworks**

How frequently the phrase was found in our dataset:

AI Text	**2.08 / 1,000,000 Documents**
Human Text	**0.1 / 1,000,000 Documents**

20x **Cultural Competence Cultural competence is**

How frequently the phrase was found in our dataset:

AI Text	**2.67 / 1,000,000 Documents**
Human Text	**0.14 / 1,000,000 Documents**

20x **this means going beyond**

How frequently the phrase was found in our dataset:

AI Text	**16.22 / 1,000,000 Documents**
Human Text	**0.83 / 1,000,000 Documents**

19x **the value of inclusive**

How frequently the phrase was found in our dataset:

AI Text	**5.53 / 1,000,000 Documents**
Human Text	**0.29 / 1,000,000 Documents**

17x **These include critical thinking**

How frequently the phrase was found in our dataset:

AI Text	**2.48 / 1,000,000 Documents**
Human Text	**0.15 / 1,000,000 Documents**

17x **individuals to adapt to the**

How frequently the phrase was found in our dataset:

AI Text	**2.64 / 1,000,000 Documents**
Human Text	**0.16 / 1,000,000 Documents**

17x **The program typically includes**

How frequently the phrase was found in our dataset:

AI Text	**1.62 / 1,000,000 Documents**
Human Text	**0.1 / 1,000,000 Documents**

15x **career trajectory is**

How frequently the phrase was found in our dataset:

AI Text	**13.08 / 1,000,000 Documents**
Human Text	**0.88 / 1,000,000 Documents**

14x **build a professional network**

How frequently the phrase was found in our dataset:

AI Text	**23.17 / 1,000,000 Documents**
Human Text	**1.63 / 1,000,000 Documents**

14x **context, and power**

How frequently the phrase was found in our dataset:

AI Text	**6.4 / 1,000,000 Documents**
Human Text	**0.47 / 1,000,000 Documents**

13x **the rigor of scientific**

How frequently the phrase was found in our dataset:

AI Text	**4.12 / 1,000,000 Documents**
Human Text	**0.31 / 1,000,000 Documents**

13x **also essential skills,**

How frequently the phrase was found in our dataset:

AI Text	**1.66 / 1,000,000 Documents**
Human Text	**0.13 / 1,000,000 Documents**

12x **and peer networks**

How frequently the phrase was found in our dataset:

AI Text	**12.7 / 1,000,000 Documents**
Human Text	**1.02 / 1,000,000 Documents**

12x **and inclusive research**

How frequently the phrase was found in our dataset:

AI Text	**5.62 / 1,000,000 Documents**
Human Text	**0.45 / 1,000,000 Documents**

12x **interventions for diverse**

How frequently the phrase was found in our dataset:

AI Text	**3.29 / 1,000,000 Documents**
Human Text	**0.27 / 1,000,000 Documents**

12x **that traditional academic**

How frequently the phrase was found in our dataset:

AI Text	**3.93 / 1,000,000 Documents**
Human Text	**0.32 / 1,000,000 Documents**

12x **Value of Networking and**

How frequently the phrase was found in our dataset:

AI Text	**4.69 / 1,000,000 Documents**
Human Text	**0.39 / 1,000,000 Documents**

10x **aligned with my interests**

How frequently the phrase was found in our dataset:

AI Text	**3.72 / 1,000,000 Documents**
Human Text	**0.36 / 1,000,000 Documents**

10x **expand my professional network.**

How frequently the phrase was found in our dataset:

AI Text	**1.92 / 1,000,000 Documents**
Human Text	**0.19 / 1,000,000 Documents**

10x **by demonstrating the value of**

How frequently the phrase was found in our dataset:

AI Text	**5.33 / 1,000,000 Documents**
Human Text	**0.52 / 1,000,000 Documents**

10x **informed by lived**

How frequently the phrase was found in our dataset:

AI Text	**1.17 / 1,000,000 Documents**
Human Text	**0.12 / 1,000,000 Documents**

10x **the data, and the need for**

How frequently the phrase was found in our dataset:

AI Text	**1.4 / 1,000,000 Documents**
Human Text	**0.15 / 1,000,000 Documents**

10x **with scientific rigor,**

How frequently the phrase was found in our dataset:

AI Text	**13.73 / 1,000,000 Documents**
Human Text	**1.44 / 1,000,000 Documents**

9x **exams like the**

How frequently the phrase was found in our dataset:

AI Text	**23.74 / 1,000,000 Documents**
Human Text	**2.56 / 1,000,000 Documents**

9x **and contributing to policy**

How frequently the phrase was found in our dataset:

AI Text	**1.57 / 1,000,000 Documents**
Human Text	**0.17 / 1,000,000 Documents**

9x **pursue board certification**

How frequently the phrase was found in our dataset:

AI Text	**2.01 / 1,000,000 Documents**
Human Text	**0.22 / 1,000,000 Documents**

9x **the intersection of security,**

How frequently the phrase was found in our dataset:

AI Text	**3.86 / 1,000,000 Documents**
Human Text	**0.43 / 1,000,000 Documents**

9x **academic research, policy**

How frequently the phrase was found in our dataset:

AI Text	**1.99 / 1,000,000 Documents**
Human Text	**0.22 / 1,000,000 Documents**

9x **observation and data collection**

How frequently the phrase was found in our dataset:

AI Text	**10.96 / 1,000,000 Documents**
Human Text	**1.23 / 1,000,000 Documents**

9x **agencies or research**

How frequently the phrase was found in our dataset:

AI Text	**2.12 / 1,000,000 Documents**
Human Text	**0.24 / 1,000,000 Documents**

9x **depending on whether someone**

How frequently the phrase was found in our dataset:

AI Text	**4.22 / 1,000,000 Documents**
Human Text	**0.48 / 1,000,000 Documents**

9x **and participatory research methods.**

How frequently the phrase was found in our dataset:

AI Text	**2.14 / 1,000,000 Documents**
Human Text	**0.24 / 1,000,000 Documents**

9x **science and ethical**

How frequently the phrase was found in our dataset:

AI Text	**4.41 / 1,000,000 Documents**
Human Text	**0.5 / 1,000,000 Documents**

9x **For instance, when a client**

How frequently the phrase was found in our dataset:

AI Text	**1.19 / 1,000,000 Documents**
Human Text	**0.14 / 1,000,000 Documents**

8x **patient empowerment through**

How frequently the phrase was found in our dataset:

AI Text	**3.12 / 1,000,000 Documents**
Human Text	**0.37 / 1,000,000 Documents**

8x **skills in conflict resolution,**

How frequently the phrase was found in our dataset:

AI Text	**4.41 / 1,000,000 Documents**
Human Text	**0.52 / 1,000,000 Documents**

8x **is to create systems**

How frequently the phrase was found in our dataset:

AI Text	**6.14 / 1,000,000 Documents**
Human Text	**0.77 / 1,000,000 Documents**

8x **managing conflicts of interest, and**

How frequently the phrase was found in our dataset:

AI Text	**2.05 / 1,000,000 Documents**
Human Text	**0.26 / 1,000,000 Documents**

8x **academic knowledge with**

How frequently the phrase was found in our dataset:

AI Text	**8.44 / 1,000,000 Documents**
Human Text	**1.08 / 1,000,000 Documents**

8x **Join or establish**

How frequently the phrase was found in our dataset:

AI Text	**1.57 / 1,000,000 Documents**
Human Text	**0.21 / 1,000,000 Documents**

7x **aim to blend**

How frequently the phrase was found in our dataset:

AI Text	**3.68 / 1,000,000 Documents**
Human Text	**0.49 / 1,000,000 Documents**

7x **Cultural competence, as**

How frequently the phrase was found in our dataset:

AI Text	**10.85 / 1,000,000 Documents**
Human Text	**1.46 / 1,000,000 Documents**

7x **advocating for inclusion**

How frequently the phrase was found in our dataset:

AI Text	**3.88 / 1,000,000 Documents**
Human Text	**0.53 / 1,000,000 Documents**

7x **requires passing the**

How frequently the phrase was found in our dataset:

AI Text	**5.65 / 1,000,000 Documents**
Human Text	**0.8 / 1,000,000 Documents**

6x **and dual relationships,**

How frequently the phrase was found in our dataset:

AI Text	**1.99 / 1,000,000 Documents**
Human Text	**0.31 / 1,000,000 Documents**

6x **is not linear, and it**

How frequently the phrase was found in our dataset:

AI Text	**2.13 / 1,000,000 Documents**
Human Text	**0.35 / 1,000,000 Documents**

6x **Research supports the importance of**

How frequently the phrase was found in our dataset:

AI Text	**2.89 / 1,000,000 Documents**
Human Text	**0.5 / 1,000,000 Documents**

6x **psychology today. This**

How frequently the phrase was found in our dataset:

AI Text	**3.35 / 1,000,000 Documents**
Human Text	**0.58 / 1,000,000 Documents**

6x **participatory and inclusive;**

How frequently the phrase was found in our dataset:

AI Text	**10.26 / 1,000,000 Documents**
Human Text	**1.78 / 1,000,000 Documents**

6x **shape future research,**

How frequently the phrase was found in our dataset:

AI Text	**4.16 / 1,000,000 Documents**
Human Text	**0.74 / 1,000,000 Documents**

5x **goals, using SMART**

How frequently the phrase was found in our dataset:

AI Text	**1.09 / 1,000,000 Documents**
Human Text	**0.2 / 1,000,000 Documents**

5x **this approach is supported by**

How frequently the phrase was found in our dataset:

AI Text	**12.66 / 1,000,000 Documents**
Human Text	**2.35 / 1,000,000 Documents**

5x **or digital forensics**

How frequently the phrase was found in our dataset:

AI Text	**1.8 / 1,000,000 Documents**
Human Text	**0.34 / 1,000,000 Documents**

5x **responsibilities include conducting**

How frequently the phrase was found in our dataset:

AI Text	**4.96 / 1,000,000 Documents**
Human Text	**0.96 / 1,000,000 Documents**

5x **Additional certifications in**

How frequently the phrase was found in our dataset:

AI Text	**6.81 / 1,000,000 Documents**

I, Dx the Rx: While Science Presents Persistent Hallucinations and Delusions, Else AI Runs the Sanity Checks for Us All

Eric D. Martin

School of Social and Behavioral Sciences, Capella University

PSY5002: Foundations of Theory and Practice for Master's Psychology Learners

Dr. Renee Ford

July 6, 2025

Abstract

This paper presents my career vision as a practitioner-scholar in forensic and behavioral psychology, informed by lived experience, operational intelligence, and a commitment to inclusive science. I discuss how course readings, peer-reviewed research, and professional interviews have shaped my trajectory and helped clarify the competencies and ethical standards required in this field. I outline three SMART goals to guide my next steps, explore the influence of disability and neurodiversity paradigms on my approach, and develop an action plan to bridge academic knowledge with real-world practice. My focus is on developing observation frameworks that democratize data and empower marginalized voices, ensuring my career is grounded in evidence-based, culturally responsive, and ethically rigorous psychological science.

Discrete Forensic Research on Subjective Observation, Reporting, and Classification

My journey into psychology did not start in a classroom; it started in the field, first as a Marine, then as a law enforcement and always as an observer with questions nobody else seemed to be asking. The longer I worked at the intersection of security, behavioral analysis, and forensic investigation, the more I realized how much was missing from the "official" record: the voices of those on the margins, the lived experiences behind the data, and the need for a science that adapts to reality, not just the other way around.

This realization led me to psychology. My vision as a practitioner-scholar is to create systems and frameworks that capture not just 'what' happened, but 'who' experienced it, and how. By integrating my own lived experience (including disability and neurodivergence) into my academic training, I intend to contribute research, practice, and advocacy that moves psychology toward true inclusivity (Gupta et al., 2023; Shakespeare, 2022).

Application of Vision

I envision my career at the intersection of forensic psychology, behavioral analysis, and inclusive research methods. As a practitioner-scholar, I aim to blend the rigor of scientific methodology with the authenticity of lived experience. My goal is to create frameworks—like the Meta Modal Platform—that bring observation and data collection into the hands of those often ignored by traditional science. This is not just an academic exercise; it is about justice, representation, and making sure the science we practice is the science we live. The value of this approach is supported by Gupta et al. (2023), who outline how integrating lived experience with professional expertise leads to more authentic, impactful psychological research, and by Shakespeare (2022), who emphasizes patient empowerment through lived expertise.

Goals

I made three personally meaningful and that are relevant to my educational and career goals, using SMART goals as quantifiers to keep focused and agile. My immediate goal is to complete my master's degree in forensic and behavioral Analysis at Capella University within two years, maintaining a GPA above 3.7, completing a capstone or practicum in a forensic context, and intentionally integrating disability-inclusive research into my work. Within three years, I plan to publish at least two peer-reviewed articles on observer-inclusive forensic frameworks by utilizing graduate coursework to develop manuscripts, seeking feedback from both faculty and lived experience

researchers, and targeting journals that prioritize disability and inclusion. Additionally, my objective is to secure a position as a forensic psychologist or behavioral analyst focusing on marginalized populations within six months of graduation. To achieve this, I will build a professional network through Capella, Washington State University, and relevant organizations; participate in professional interviews; and apply to agencies or research groups with inclusive missions.

Influence of Research and Resources

Reading widely in psychology, disability studies, and neurodiversity has shifted my vision from being an "observer on the outside" to becoming an "advocate from within." Gupta et al. (2023) changed how I view the scientist/practitioner divide by demonstrating the value of hybrid lived-experience researchers. Similarly, Griffin and Pollak (2009) showed that traditional academic support often fails to capture neurodiverse realities, underscoring the necessity for data frameworks that adapt to real experience, rather than forcing individuals to adapt to the system. Fusar-Poli et al. (2023) presented a model for participatory, co-produced research in which experts by experience help shape the science itself. Shakespeare (2022) further highlighted how lived expertise and peer networks empower individuals and should be considered central to both research and practice.

Resources from the Capella Career Center and course materials have reinforced the idea that both rigorous research and pragmatic, real-world application must guide evidence-based practice. Journals such as Disability & Society and World Psychiatry consistently emphasize the value of inclusive and participatory research methods. Ultimately, I have learned that genuine progress in psychology emerges from combining lived experience, observation, and empirical evidence never providing privileging one more at the expense of the others.

Value of Networking and the Professional Interview

[value of networking]

Research supports the importance of collaborative relationships, as they expand access, deepen understanding, and enable valuable cross-pollination between academic and practitioner communities (Gupta et al., 2023; Shakespeare, 2022). Within my specialization, success depends on developing a broad set of professional competencies. These include critical thinking and evidence-based analysis; mastery of advanced research methods, particularly those that are participatory and inclusive; and proficiency in forensic assessment, expert testimony, and behavioral profiling. Cultural competence, as emphasized by Griffin and Pollak (2009), is essential, as are skills in conflict resolution, mediation, and crisis intervention. Additionally, integrating data from multiple sources–such as observation, records, and interviews–alongside a commitment to ongoing learning and self-reflection, forms the foundation for ethical and effective practice in forensic and behavioral psychology.

Specialization-Specific Professional Competencies

Professional requirements for this specialization begin with completing the master's degree in forensic and behavioral Analysis at Capella University. This is followed by meeting all state and national licensure requirements, including exams like the EPPP and supervised post-graduate hours. Additional certifications in forensic evaluation, disability studies, or digital forensics will be pursued, along with maintaining accreditation through programs recognized by the APA or ABFP. Ongoing continuing education is necessary to remain up to date with emerging research, ethical guidelines, and developments in digital practice.

Critical Thinking

Critical thinking is a tool that bridges data and meaning. In practice, this means going beyond surface-level findings to interrogate data: Why do two credible witnesses remember an event differently? What institutional or cultural forces might shape or suppress observation? Can a mathematical model reconcile conflicting narratives without erasing the realities of those involved? For instance, when a client with a neurodivergent diagnosis provides information that contradicts the official record, critical thinking requires neither dismissing nor uncritically accepting the account, but examining how bias, context, and power may shape every perspective.

Cultural Competence

Cultural competence is not a box to be checked, but an ongoing process that involves reflection, exposure, and adaptation. In my work, this

means integrating feedback from marginalized communities into forensic methods, engaging in cultural humility and self-audits (Griffin & Pollak, 2009), prioritizing participatory and co-designed research methods whenever possible, and continually examining my positionality and potential blind spots.

Ethical Competencies

Ethical competencies are foundational in forensic and behavioral psychology; they will not be, depending on whether someone gets enough violations to be suspended or worse. This matter-of-fact statement speaks to the transparency and high standards found in psychology today. This includes but is not limited to maintaining confidentiality, obtaining and understood inform consent, and protecting vulnerable populations (APA, 2017 and dual relationships, plus managing conflicts of interest, and overseeing complex disclosures are also essential skills, as emphasized by Gupta et al. (2023). Adherence to the APA Code of Ethics and also staying current with evolving best practices–especially regarding digital and AI-assisted psychology–are crucial for responsible practice.

Key professional responsibilities include conducting forensic evaluations, designing and implementing observer-inclusive research methods, and contributing to policy and system reforms that promote disability inclusion.

Action Plan

My action plan includes: completing my master's degree at Capella within the next two years to build foundational and specialized forensic skills; publishing at least two peer-reviewed articles on inclusive methodologies within three years to gain research and writing experience; and, within six months post-graduation, securing a forensic psychologist or analyst position to gain field experience and expand my professional network.

Specialization-Specific Professional Requirements

After earning my master's degree in forensic and behavioral Analysis at Capella University, I intend to pursue a research focused PhD in Behavior Analysis, Neuropsychology, or another area aligned with my interests in observer-inclusive science and disability studies. The program typically includes a successful defense of a dissertation. My career trajectory is toward academic research, policy innovation, and think tank leadership, rather than direct clinical practice or state licensure. Instead of accruing supervised fieldwork or clinical hours, I will prioritize experimental design, collaborative research projects, publication in peer-reviewed journals, and the development of new frameworks for inclusive psychological science.

This path influences me to influence policy, shape future research, and drive the adoption of scientifically rigorous, observer-inclusive methodologies across the behavioral sciences.

Action Plan Table (Accelerated, Research/Think Tank Path)

Duration Goal/Milestone Skills/Experience Gained Assessment/Checkpoint

1 year Complete Capella Master's in Forensic & Behavioral Analysis Foundational theory, research methods, analytics Degree awarded, capstone completion

1 additional year Earn a research-focused PhD (e.g., Behavior Analysis, Neuropsychology) Advanced research, dissertation, publication Dissertation defense, peer-reviewed papers

Immediately post-PhD Join or establish a research group/think tank Research leadership, grant writing, and innovation Research proposals, collaborative projects

Ongoing Publish, present, and influence policy Academic reputation, network building Journal articles, conference presentations

Upon completion of the PhD, I will pursue board certification as a Behavior Analyst (BCBA-D), which requires passing the Behavior Analyst Certification Board (BACB) exam and accruing supervised field experience hours. Then I can take the LBA in Washington State. These steps will prepare me for a career that bridges forensic practice, disability advocacy, and academic research, allowing me to advance observer-inclusive science and ethical behavioral interventions for diverse and marginalized populations.

Conclusion

The journey to becoming a practitioner-scholar in psychology is not linear, and it is never about collecting credentials or following a template. For me, it means learning to reconcile lived reality with scientific rigor, advocating for inclusion while upholding the highest standards of evidence, and remaining open to new perspectives—especially those at the margins.
